The Board consists of nine members.

- Members consist of residents of the City, and high school students.
- The Board meets on a monthly basis.
Getting Started
- The Green Team started off in a million directions.
- The combination of residents and students quickly became a tremendous asset. Sharing ideas and visions.

Projects
- The Green Team has recommended to the City a program to provide affordable, high efficiency light bulbs to City residents. The City will purchase in bulk and pass the savings onto the residents.

Projects
- The Green Team has recommended to the City a policy that creates incentives for residents to purchase and install low flow toilets, shower heads, and other fixtures.
Projects

- The Green Team is investigating and working towards the installation of a hydro electric generator at the Linden Library, Linden Museum, and City Council Chambers. The Building sits adjacent to the Mill Pond Dam.

Education and Outreach

- Cooperating with the local school districts through student participation. Students have taken new ideas and policy to the schools to encourage and promote green initiatives.

- The Green Team has put together a list of “did you know” facts for publication in the City’s newsletter. Also the Green Team will be launching a webpage on the City’s website for informational purposes.
Education and Outreach

- The Green Team participates in local events with informational booths. Handing out material and answering questions has shown to be a big success. The public has taken advantage of the opportunity beyond expectations.

Education and Outreach

- The Green Team has partnered with the County’s recycling program to bring recycling opportunities to the City. Mobile recycle bins are set up at all local events, and the County has a mobile recyclable trailer to afford residents the opportunity to recycle items not covered by the local waste contract.

Education and Outreach

- The Green Team will publish on a regular basis recycle statistics for the City. The Team will set goals for recyclable material collected and publicly encourage the City to attain those goals as a community.
Governmental Change

- The Green Team will work in conjunction with city administration to incorporate stronger language in the City’s solid waste contract. When the contract is bid, the City will seek more aggressive recyclable parameters from the contractor. The City will also dictate where the recyclables go and require reimbursement.

Governmental Changes

- The Green Team will be working with the City to apply for grants and other funding sources to “green” city buildings.

- Grants will also be sought on behalf of prospective commercial buildings new and existing to promote green building initiatives.

Governmental Change

- The Green Team has and will recommend zoning amendments to incorporate suggestive green building design for new construction. Also incorporate into the zoning ordinance better storm water management.
Governmental Change

- The City shall lead by example by becoming more energy efficient: including vehicle idle policies, building lighting and temperature control, bid consideration for new vehicles such as E85 trucks, Bio-Gas or Bio-Diesel fuels.
